REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art does not teach, in combination with the other elements recited in claims 32, 43, and 54, at least a portion of the second chamber contents entering the diffuser chamber through the throttling orifice (claim 32), the gas treatment element comprising a filter element composed of a woven metal (claim 43), or the reaction products passing through the gas treatment element to contact and move the chamber opener (claim 54). It is noted that in the embodiment where there is a wire mesh in Yamazaki et al US006908105B2 (column 12, lines 11-16), claim 43 particularly would not be anticipated or obvious in view of Yamazaki et al because the second chamber contents would not be heated by the gas treatment element already heated by the first chamber reaction products (last subparagraph of claim 43).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Culbreth whose telephone number is 571/272-6668. The examiner can normally be reached on Monday-Thursday, 9:00-6:30.
